P270 - Do not eat, drink or smoke when using this product.

P281-Use personal protective equipment as required.

P308 + P313 - IF exposed or concerned: Get medical advice/attention.

P314 - Get medical attention/advice if you feel unwell.

P405- Store in a safe, secure location.

P501 - Dispose of contents/container in accordance with local regulations.

SUMMARY: Prolonged and repeated exposure to excessive concentrations of this product's dust containing respirable size ( $\leq 10 \mu$ ) quartz, or any nuisance dust, can cause chronic pulmonary disease. Dust contact with eyes may cause temporary scratchiness or redness. Long term exposure can cause silicosis. The NTP (National Toxicology Program) and IARC (International Agency for Research on Cancer) has determined that crystalline silica inhaled from occupational sources can cause cancer in humans. Risk of injury is dependent on the duration and level of exposure. A single exposure under normal conditions will not result in serious adverse effects.

MEDICAL CONDITIONS WHICH MAY BE AGGRAVATED: Pre-existing upper respiratory and lung disease, such as, but not limited to: Bronchitis, emphysema, and asthma.

## TARGET ORGAN(S): Lungs, Eyes. See SECTION X1 - TOXICOLOGICAL INFORMATION

SECTION III - COMPOSITION OF SUBSTANCE						
HAZARDOUS INGREDIENTS	%	CAS NUMBER	OSHA PEL (ACGIH TLV)	LD50/ /LC 50 SPECIES AND ROUTE		
<b>Naturally Occurring Diatomaceous Earth</b> (Typical Analysis = 67% Silicon Dioxide)	100%	61790-53-2	See Section VIII	N/av.		
Free Crystalline Silica or Silica, quartz (Occurs naturally in Diatomaceous Earth)	<1%	14808-60-7	See Section VIII	N/av.		
For sampling silica dusts refer to NIOSH Analytical Method 7500 or OSHA method ID 142

EYE	Use protective goggles in high dust conditions.	
FOOTWEAR	As required on jobsite.	
CLOTHING	Wear coveralls in high dust conditions.	
RESPIRATOR	Avoid breathing dust. See instructions below	

Bureau of Mines or NIOSH approved respirators for protection against pneumoconiosis producing dusts recommended when dust is present. If the dust concentration is less than ten (10) times the Permissible Exposure Limit (PEL) use quarter or half mask respirator (N95) with replacement dust filter or single use dust respirator with valve. If dust concentration is greater than ten (10) times and less than one hundred (100) times the PEL use full faceplate respirator with replaceable dust filter (N95 filter); if greater than one hundred (100) and less than two hundred (200) times the PEL use power air purifying (positive pressure) respirator with replaceable filter (N95 filters); if greater than two hundred (200) times the PEL use flow type (positive pressure), with full facepiece, head or helmet.
