

Abbreviations used on this Safety Data Sheet: N/av. = Not available, N/ap. = Not applicable, ppm = parts per million, TLV = Threshold Limit Value. NFPA Hazard Rating: 4-Extreme, 3-High, 2-Moderate, 1-Slight, 0-None, X-Blank

SECTION I - IDENTIFICATION OF THE MATERIAL AND SUPPLIER				
PRODUCT NAME:	Wundercat Scented Antibacterial Non-		4 - extreme	
	Clumping Cat Litter		3 - high	
OTHER NAMES:	Diatomaceous Earth	$\langle 1 \rangle \langle 1 \rangle$	2 - moderate	
	Amorphous Silica		1 - slight	
MATERIAL USE:	Cat Litter		0 - insignificant	
MANUFACTURER'S NAME:	Progressive Planet Products Inc.	NFPA HAZARD RATING	; :	
STREET ADDRESS:	724 East Sarcee St.	Health - 1, Flammability - 0	, Reactivity - 1	
CITY/PROVINCE:	Kamloops, BC			
POSTAL CODE:	V2H 1E7	\		
EMERGENCY TELEPHONE NUMBER:	1-800-667-0336	VVUIV	DERCAI	

SECTION II - HAZARD IDENTIFICATION

This product is labelled in accordance with regulations administered by the Canada Consumer Product Safety Act. In the workplace, the use pattern and exposure are generally not equivalent with those experienced by consumers. The requirements of the Globally Harmonized System of Classification and Labelling of Chemicals applicable to this SDS differ from the labelling requirements of the Canada Consumer Product Safety Act and, as a result, this SDS may contain additional health hazard information not pertinent to consumer use and not found on the product label.

GHS Classification Substance or Mixture

Carcinogenicity	Category 1A - H350i
Specific Target Organ Toxicity - (Repeated Exposure)	Category 1 - H372

Label Elements:

Hazard Pictogram

Signal Word: Danger

Hazard Statements:

H350i - May cause cancer by inhalation.

H372 - May cause damage to organs through prolonged or repeated exposure if inhaled.

Precautionary Statements:

P201 - Obtain special instructions before use.

P202 - Do not handle until all safety precautions have been read and understood.

P260 - Do not breathe dust/fume/gas/mist/vapors/spray.

P264 - Wash face, hands and any exposed skin thoroughly after handling.

P270 - Do not eat, drink or smoke when using this product.

P281-Use personal protective equipment as required.

P308 + P313 - IF exposed or concerned: Get medical advice/attention.

P314 - Get medical attention/advice if you feel unwell.

P405- Store in a safe, secure location.

P501 - Dispose of contents/container in accordance with local regulations.

SUMMARY: Prolonged and repeated exposure to excessive concentrations of this product's dust containing respirable size ($\leq 10 \,\mu$) quartz, or any nuisance dust, can cause chronic pulmonary disease. Dust contact with eyes may cause temporary scratchiness or redness. Long term exposure can cause silicosis. The NTP (National Toxicology Program) and IARC (International Agency for Research on Cancer) has determined that crystalline silica inhaled from occupational sources can cause cancer in humans. Risk of injury is dependent on the duration and level of exposure. A single exposure under normal conditions will not result in serious adverse effects.

MEDICAL CONDITIONS WHICH MAY BE AGGRAVATED: Pre-existing upper respiratory and lung disease, such as, but not limited to: Bronchitis, emphysema, and

TARGET ORGAN(S): Lungs, Eyes.

See SECTION X1 - TOXICOLOGICAL INFORMATION

SECTION III - COMPOSITION OF SUBSTANCE					
HAZARDOUS INGREDIENTS	%	CAS NUMBER	OSHA PEL (ACGIH TLV)	LD50/ /LC 50 SPECIES AND ROUTE	
Naturally Occurring Diatomaceous Earth (Typical Analysis = 67% Silicon Dioxide)	100%	61790-53-2	See Section VIII	N/av.	
Free Crystalline Silica or Silica, quartz (Occurs naturally in Diatomaceous Earth)	<1%	14808-60-7	See Section VIII	N/av.	
Fragrance Blend	< 1%	Proprietary Mixture	N/ap.	N/av.	
Myacide AS Technical	<0.005 %	52-51-7	N/av.	307mg/kg acute oral rat (male)	

For sampling silica dusts refer to NIOSH Analytical Method 7500 or OSHA method ID 142

X X X X		SECTION IV - F	IRST AID MEASURES			
Inhalation:	Remove victim to fresh air. If breathing has stopped, a trained person should perform artificial respiration. Acute inhalation can cause dryness					
Ingestion:	of the nasal passage and congestion of the upper respiratory tract. Do not induce vomiting. Short-term exposure not considered harmful. Drink generous amounts of water to reduce bulk and drying effects.					
Eyes: Skin:	Wash with large quantities of water. Consult physician if irritation persists. May cause irritation/inflammation. May cause dryness. Remove contaminated clothing. Wash with soap and water until clean. Use moisture renewing lotions if dryness persists. Product is not absorbed through or by the skin.

SECTION XI - TOXICOLOGICAL INFORMATION

PRIMARY ENTRY ROUTE(S):

May cause temporary irritation or inflammation. Eyes: Skin: May cause dryness with continued exposure.

Quality Control Staff, Progressive Planet Products Inc.

Ingestion: Not considered harmful, by mouth, throat, and/or stomach. Minor irritation may occur.

Inhalation:

Persistent dry cough, throat irritation and labored breathing on exertion are symptomatic of exposure to airborne dust. Exposure may aggravate existing upper respiratory tract diseases such as asthma, bronchitis or emphysema. Acute (short term) exposure to dust levels exceeding the PEL may cause irritation of respiratory tract resulting in a dry cough. Eyes may develop redness and become itchy. Chronic (long term) exposure to crystalline silica contained by airborne diatomaceous earth, where levels are higher than TLV's, may lead to the development of silicosis, other respiratory problems, or some forms of cancer. From the International Agency for Research on Cancer (IARC), in a 2012 review of SILICA DUST, CRYSTALLINE, IN THE FORM OF QUARTZ OR CRISTOBALITE (monograph 100C) concluded that "Crystalline Silica in the form of quartz or cristobalite dust is carcinogenic to humans (group 1)." The NTP (National Toxicology Program has determined that "Respirable crystalline silica, primarily quartz dust occurring in industrial and occupational settings, is know to be a human carcinogen."

SECTION XII - ECOLOGICAL INFORMATION

Product is generally considered chemically inert in the environment. Used product that has become contaminated may have significantly different characteristics than uncontaminated product, and should be re-evaluated accordingly. Dispose of in accordance with Local, State, and Federal regulations.

SECTION XIII - DISPOSAL CONSIDERATIONS

Uncontaminated waste is not hazardous as defined by the Resource Conservation and Recovery Act (RCRA, 40 CFR261). Contaminated waste must be evaluated based on contamination source. Consult local agencies as needed. Dispose of in accordance with Local, State, and Federal regulations.
